Physician Well-Being: Cases and Solutions, by Peter Yellowlees. American Psychiatric Association Publishing, 2020, 265 pp., \$55.00 (paper)

Correction to Maron-Katz et al.

When the article “Individual Patterns of Abnormality in Resting-State Functional Connectivity Reveal Two Data-Driven PTSD Subgroups,” by Adi Maron-Katz, Ph.D., et al. (doi:10.1176/appi.ajp.2019.19010060) was published online on December 16, 2019, there was a statement attributed to incorrect citations. In the first paragraph of the Results section, the previous comparisons of healthy and PTSD groups that led to the kind of network features that were expected should have referred to the following studies:

Daniels JK, McFarlane AC, Bluhm RL, et al.: Switching between executive and default mode networks in posttraumatic stress disorder: alterations in functional connectivity. *J Psychiatry Neurosci* 2010; 35:258–266

Zhang Y, Liu F, Chen H, et al.: Intranetwork and internetwork functional connectivity alterations in post-traumatic stress disorder. *J Affect Disord* 2015; 187:114–121

Koch SBJ, van Zuiden M, Nawijn L, et al.: Aberrant resting-state brain activity in posttraumatic stress disorder: a meta-analysis and systematic review. *Depress Anxiety* 2016; 33:592–605

This correction was made for the article’s appearance in the March 2020 issue and the online edition of the issue.

Correction to Leucht et al.

When the article “Dose-Response Meta-Analysis of Antipsychotic Drugs for Acute Schizophrenia,” by Stefan Leucht et al. (doi: 10.1176/appi.ajp.2019.19010034) was published online on December 16, 2019, the 95% effective dose for asenapine was reported correctly as 15 mg/day in the abstract and in Table 1 but was misreported in the Results section of the main text. The text was corrected and the article was reposted on January 23, 2020.

Correction to Hasin et al.

When the article “U.S. Adults With Pain, a Group Increasingly Vulnerable to Nonmedical Cannabis Use and Cannabis Use Disorder: 2001–2002 and 2012–2013,” by Deborah S. Hasin et al. (doi:10.1176/appi.ajp.2019.19030284), was published online on January 22, 2020, reference 64 cited an incorrect reference. The reference was corrected and the article was reposted on January 30, 2020.
